

## Are you worried that your child will start smoking cannabis or has already tried it?

In that case, you're welcome to attend Mini-Maria's parental training in cannabis and drug knowledge

*Among other things, we will discuss:*

- how cannabis and other drugs affect the user physically, mentally and socially
- how you, as a parent, can talk to your child about drugs
- how you can objectively rebut commonly made arguments

We will meet on a couple of occasions in a group of approximately eight to ten parents. Participants have a duty of confidentiality. The course is free of charge.

*Ask questions and apply to:*
